[Construction Formulas | Construction Estimating Math Formulas](#)

Plinth area Estimate (Based on Rough Cost) Plinth area of a building means Length x Breadth (roofed portion only) excluding plinth offsets. The estimates are prepared on the basis of plinth areas of the various buildings proposed to be constructed. The rates are being arrived at the dividing the total cost of construction with its plinth area. For example if total cost of a building is Rs. 2 lac and its plinth area is 50 sq. m. then plinth area rate = $2,00,000 = \text{Rs.}4000/-$ per 50 sq.m. Using ...
